Information For Our Patients About Usual and Customary Insurance Benefits

Your insurance company has developed maximum fee schedules for dental services. These schedules are internal to your insurance company and they may or may not cover all charges incurred during your treatment. The fee schedules often do not reflect standard charges in our area. Please be advised that you are responsible for the total charges or any difference remaining following payment by your insurance company. If you do not feel your insurance company has made adequate payment on your account, please contact them or your Human Resources manager to discuss this matter.

I have been informed that my insurance benefits are "usual and customary" and understand the meaning of this. I understand that any balance due after my insurance reimbursement will be automatically charged to my credit card.
